Projects

AI-Powered Placement Readiness Platform **/communication-readiness-platform**
React 19, PostgreSQL, FastAPI, Tailwind CSS, Groq ***Sep. 2026 – Present***

- Developed a voice-first placement preparation platform featuring resume-grounded AI mock interviews, adaptive question difficulty, and speech-based interaction using browser speech APIs
- Implemented speech analytics to evaluate communication clarity, technical depth, speaking pace (WPM), and filler-word frequency in candidate responses
- Designed five role-based portals for students, faculty mentors, program administrators, domain trainers, and placement coordinators, with browser focus monitoring and mentor-verified readiness checklists

Learn HTML **/Learn-HTML**
HTML, Git, Vercel ***April 2026 – Present***

- Built and deployed a beginner-friendly, 9-topic HTML learning resource on Vercel, covering headings, tables, media, and file paths; expanding based on user feedback

Open Source

GirlScript Summer of Code (GSSoC '26) **2026**
Open-Source Contributor, ajay-dhangar/algo

- Wrote Java and Python cheatsheets for a beginner-friendly DSA reference site (**PR #2050**), covering collections, OOP, streams, comprehensions, itertools, and exception handling with commented examples
- Incorporated maintainer review feedback: adjusted sidebar positioning, added titles to every code block, and linked official Python and Oracle Java documentation as references
